About comma CMMS

comma CMMS, is a product of [Parafernalía, Ltd](#) a software company registered in Macau SAR and Hong Kong SAR that started operations in April 2013. comma CMMS was founded by Rui Alves, a serial entrepreneur and a C&I maintenance engineer with more than 15 years in the field of industrial maintenance as well as another 15 years of programming experience.

This uncommon mix of industrial maintenance experience and programming skills along with many hours of usage of large (and expensive) CMMS systems such as IBM maximo and SAP PM, allowed for a knowledge synergy that resulted in comma CMMS.

At the end of 2017, comma CMMS is used by close to 3000 companies worldwide and is growing at a rate of approximately 40 new companies a month. We must clearly be doing something right!

NOTE: comma CMMS is a professional-grade solution for industrial-based companies with self-imposed, regulatory and/ or insurance maintenance management requirements with multiple-staff on their maintenance teams. This is not a ticket resolution system like you would have for an IT support team or similar.

You can register for free use of the system anytime, so you have nothing to loose. [Register today!](#)

Feel free to [contact](#) our team anytime, we will be delighted to assist!

Unique solution ID: #1035
